and RS-16

25X1A5a1

1. In accordance with our request during our recent visit to [REDACTED] called at about 1500 to submit a verbal proposal for the redesign and clean-up of the present [REDACTED] field unit.

25X1A

2. For specific redesign of the coder, redesign of the power supply, and partial redesign of the receiver, plus the general clean-up of the remainder of the circuitry, [REDACTED] quotes \$225,000.00 for the first two units; the balance in quantities of 5-20, \$22,000.00 per unit.

25X1A5a1

25X1A5a1

3. [REDACTED] pointed out that this work will constitute practically all of the redesign for the coder and power supply, originally considered under RS-16 proposal, and about one-half of the receiver redesign required, so that from this point, RS-16 development should be about 1/3 to 1/2 completed.
